PROFILE

Highly motivated, diligent software engineer with 1 year experience in full stack programming at a company operating in the global market. Proficient in software development life-cycle from design, development and testing of user interfaces to managing databases. Committed to teamwork and innovation.

WORK EXPERIENCE

FULL STACK DEVELOPER

FMT Group

June 2021 - August 2022

- Developed six modules corresponding to company departments for a CRM software in the form of a responsive web application using HTML, Bootstrap, PHP, MySQL, jQuery.
- Designed, created and maintained MySQL database.
- Maintained, repaired and updated existing CRM modules while regularly interacting with the users and adding functionalities to increase work efficiency.
- Gained experience in designing and developing Admin Dashboards.
- Conducted regular meetings with top company managers and other departments in order to understand the gaps and problems in the supply chain management. Implemented these business needs and functional requirements in the CRM software to help the whole chain for daily operation and Directors' reports.
- Worked closely with a Senior Programmer as well as the Research & Development Department.
